### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Response to Arguments***

***Claim Rejections - 35 USC § 112***

2. Claims 23-25 remain rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting an essential step, such omission does not set forth the method in clear and unambiguous terms, and is repeated for the reasons of record in the official action mailed 12-14-01.

Applicant's arguments filed 6-07-01 have been fully considered but they are not persuasive. Applicants traverse this rejection by way of amendment, particularly by amending claim 23 to recite a step that correlates the method with the objective of the method. However, the instant method remains ambiguous since it does not provide a step that clearly correlates how detecting the presence of a detected heteroduplex would indicate the ability of an antisense compound to reach and interact with *c-myc* in vessel cells. It is unclear how the detection of the presence of heteroduplexes in the body fluid of an individual would provide any evidence that the morpholino antisense compound of the instant invention actually reached its *c-myc* target mRNA, specifically in vessel cells. The claimed method does not state that the sample of body fluid is isolated particularly from vessel cells, therefore it is unclear how this method of detection would produce results particularly regarding the interaction of a morpholino antisense compound with *c-myc* mRNA specifically in vessel cells.

Art Unit: 1635

3. Claims 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 recites the term "said antisense", this term is spelled incorrectly, and the correct term is likely to be "antisense." Additionally, there is lack of antecedent basis for this limitation in the claim.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
